

Denatonium Benzoate, Granular

CAS 3734-33-6

EINECS 223-095-2

The chemical is supplied in granulated form, generating less dust than powdered denatonium benzoate.

Packaging: 1kg PE bottle containing a water-soluble PVA bag. 10 bottles per box.

Material Specifications

Appearance	white granules
Purity	min. 99%
pH (3% water solution)	6,5 – 7,5
Chlorides	max. 0.2%
Loss on drying	max. 1.0%
Melting point	163 - 170 °C

Denatonium benzoate is the most bitter substance ever discovered. It is effective at concentrations as low as 0.05 ppm. At around 10 ppm, the bitter taste is so strong that any treated matter becomes completely inedible.

It is used for alcohol denaturation, prevention of accidental consumption, as an animal repellent, in cosmetics, in car-cleaning products, etc.

Alchimica s.r.o, has been supplying denatonium benzoate to various markets in and outside the EU since 1999.

Classification according to Regulation (EC) No. 1272/2008:

GHS hazard statements: H302 Harmful if swallowed. H412 Harmful to aquatic life with long lasting effects.

GHS precautionary statements: P273 Avoid release to the environment.

Signal words: Warning
